

# Managing Web Access using Role-Based Security

December 15, 2005

Brian Vladimiroff

IT Services

Pacific Northwest National Laboratory

# Web Server Administration

- ▶ Maintaining Patch Levels
  - Stable/Secure Environment
- ▶ Maintaining Websites
  - Creation
  - Deletion
- ▶ Troubleshooting
  - Server Problems/Site Problems
- ▶ Configuring Website Access
  - Adding/Removing Users
  - Debugging User access issues
- ▶ Other Tasks

# Modifying Website Access

## ► Workflow

- Access is defined by the Owner
- Requests are made to the Web Server Administrator
- Web Server Administrator makes the change
- Web Server Administrator notifies the Owner

## ► Problems

- Requests are delayed
- Mistakes can be made
- Work is duplicated

# Key Concepts

- ▶ What is Role-Based Security?
  - Users with similar job functions are grouped together into roles
  - Access to resources is controlled using roles
  - Management of role membership is done by the owner of the role

# Practical Implementation

## ▶ Role Based Access Control (RBAC)

- A Role Based Access Control system was implemented at the Pacific Northwest National Laboratory
- Integrated with Microsoft Active Directory
- Robust Application Programming Interface (API)

## ▶ RBAC Administration Website

- Manage roles and role membership in a single interface
- Gives control of access to owners

# Example

ViewApplication - Microsoft Internet Explorer

File Edit View Favorites Tools Help

Address <http://rbac.pnl.gov/ViewApplication.aspx?ApplicationName=WSS.telephoneservices> Go Links

**RBAC**  
Role Based Access Control

Home -> Web Services Support -> telephoneservices

Go View New + X

Roles Operations Administrators Properties Reporting

Name	Path
<input type="checkbox"/> Athar, Masood	PNL\MASOOD
<input type="checkbox"/> Best, Daniel M	PNL\D3M829

Done Local intranet

# Example

ViewRole - Microsoft Internet Explorer

File Edit View Favorites Tools Help

Address <http://rbac.pnl.gov/ViewRole.aspx?RoleName=WSS.telephoneservices.Telephoneservices-viewers> Go Links >>

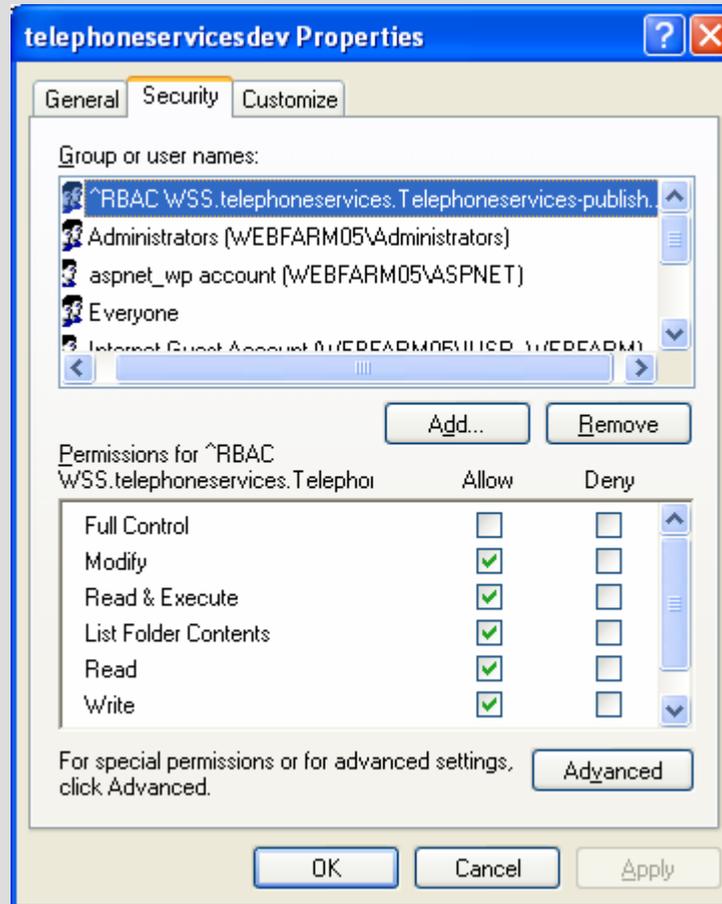

**RBAC**  
Role Based Access Control

Home -> Web Services Support -> telephoneservices -> Telephoneservices-viewers

Members	Responsible For	Member Of	Operations	Line of Authority	Properties
<input type="checkbox"/> Adams, Patricia I					
<input type="checkbox"/> Bailey, Karen M					
<input type="checkbox"/> Best, Daniel M					
<input type="checkbox"/> Brambley, Anita C					
<input type="checkbox"/> Brotherton, Esther					
<input type="checkbox"/> Capiral, Phillip M					
<input type="checkbox"/> Fastabend, Linda K					
<input type="checkbox"/> George, Angela M (PNNL)					

Done Local intranet

# Example

# Other Uses of Role-Based Security

- ▶ File share access
- ▶ Dynamic website content
- ▶ Email distribution lists
- ▶ Delegation Management

# Questions
